

1. Removing locator ring

2. Center ring over camera lens

3. Place iLoupe over locating ring

4. Ring on glass without clip

*Ring on glass with clip

i LOUPE

The iLoupe is an easy-to-use device that allows you to see into a diamond using your eye, a tablet or mobile device.

USE A PHONE OR TABLET

1. Remove the locator ring from the base of the iLoupe.
2. Place the ring onto the front of your tablet/ phone and center it over the camera.
3. Place the iLoupe on top of the locator ring.
4. Place the diamond on the iLoupe glass
5. Open the GemEx iLoupe app to see a live image of your diamond

* Slide clip on to stabilize ring if needed

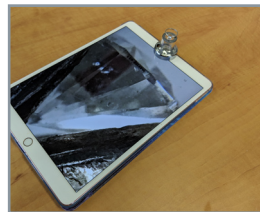

6. Zoom in on the diamond with up to 40x magnification to identify the internal characteristics of your diamond

Use your eye to view the diamond

SAVE YOUR DIAMOND IMAGES

1. Press the picture button and name your diamond. After it is named, it saves to your diamond library.
2. The library stores all of your diamond images and allows you to reference your diamond collection at any time.
3. Share your library images with email, text or social media.

VIEW THE DIAMOND GIRDLE ENGRAVING

1. Place the diamond girdle onto the glass surface of the iLoupe. Zoom to read the girdle serial number.

USE YOUR EYES TO SEE THE DIAMOND

1. Place the diamond on the iLoupe glass. Use the clip to hold the diamond or ring.
2. Look through the bottom of the iLoupe to see your diamond.
